Analysis of Results by Business Unit

JBS USA Beef (including Australia and Canada)

This business unit posted net revenues of US\$5.19 billion, expanding 14.8% compared to 1Q14, supported by the increase in sales prices of 16.7% in domestic and 6.4% in export markets. Volumes sold in the international market increased 4.2% over 1Q14, while volumes in the domestic market remained stable. The number of animals processed decreased 1.1% in comparison to the same period last year.

EBITDA was US\$186.6 million in the quarter, compared to a negative US\$22.5 million in 1Q14. EBITDA margin was 3.6%. The company was successful in its cattle procurement strategy, aligned with better pricing of its products, which contributed to expanding the gross margin in the period.

Independent management of the fed cattle and regional businesses allowed the company more flexibility and agility in the decision-making process and faster adjustments to market conditions.

In Australia, the weakening of the local currency partially compensated the increase in raw material costs and operations, preserving the good performance presented in the last few quarters. Australia has unique sanitary conditions and has benefited from free trade agreements signed with the major beef importers in Asia.

Analysis of Results by Business Unit

JBS USA Pork

Net revenue in the pork business was US\$762.3 million, a reduction of 15.0% compared to 1Q14. Sales were impacted by the pork prices decline of 20.3% in domestic and 6.3% in international markets, partially compensated by higher volumes sold in both markets.

The reduction in pork prices reflects an oversupply of hogs, which on the other hand enabled better volumes. In 1Q15, the number of animals processed increased by 5.1% in comparison to 1Q14, allowing the company to dilute operational fixed costs.

The pork business unit posted EBITDA of US\$93.2 million, an expansion of 12.4% compared to the same period last year, with an EBITDA margin of 12.2%. Cheaper raw material costs contributed to the expansion of 3.2pp in gross margin relative to 1Q14 and explains the improvement in EBITDA in the quarter.

JBS USA Chicken (Pilgrim's Pride Corporation - "PPC")

Pilgrim's Pride reported US\$2.05 billion in 1Q15, an increase of 1.7% compared to the same period last year. In the US, overall cutout pricing has remained strong, supported by the increase in consumption and more competitiveness of chicken. Demand in international markets has softened over 1Q14, because of the closure of some markets related to sanitary conditions, while importing demand from Mexico continued robust. Sales from PPC Mexican operations increased 4% in volume in relation to 1Q14.

EBITDA totaled US\$363.5 million, a 77.2% growth compared to 1Q14, and reflects the Company's strategy to focus on diversifying its products portfolio and management of its sales channels. The company has chosen to maintain its exposure to small birds, which has strengthened PPC leadership in this segment, and increased overall profitability of the business. Pilgrim's also have leading positions in the big bird deboning and case-ready retail chicken and approximately 20% of its total sales in prepared foods.

PPC net income in the quarter was US\$204.2 million, an improvement of 108% compared to 1Q14. Free cash flow generation was US\$264.4 million after taxes and after US\$32 million in capital investments.
